

How to Use Share the Ride NC for One-Time Trip Matching

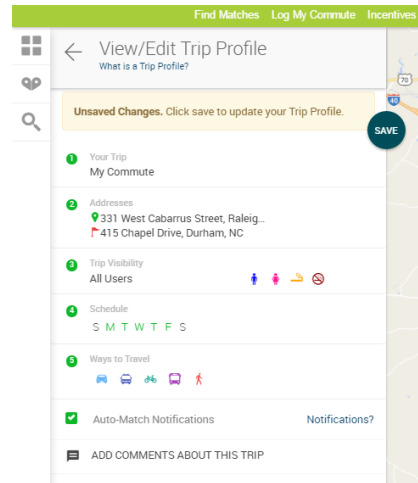

- Visit your university site:
Duke University: DukeUniversity.ShareTheRideNC.org
NC State University: NCSU.ShareTheRideNC.org
University of North Carolina at Chapel Hill: UNC.ShareTheRideNC.org
Wake Tech Community College: WakeTech.ShareTheRideNC.org

- Use your university email address to create a personal profile.
Be sure to select “University – Student” in the Employer/College section of your profile if you’re a student

- Once registered, you will be prompted to set up a trip profile.

Enter your home address and your destination address. Be sure to also select whether you wish to be a driver or passenger. If you’re willing to do both, select both. You can also find transit, cycling and walking partners in the trip profile section.

Be sure to turn on auto-match notifications so that you will be informed when other matches are searching for a similar trip.

- After completing your trip profile, click on the “My Dashboard” icon. Go to “Find My Commute Options” and click “Search.” In the next screen, be sure to select “One Time Trip” in the drop-down menu at the top right of the screen.

Double-check the departure date and time to ensure that the information listed is correct. Note that you will need to create a trip profile for both your departure for home and your return trip to campus.

STRNC will automatically list your trip matches, from which you can select to “Offer Ride” or “Request Ride.” If no match is found during your initial search but you’ve selected to receive auto-match notifications, you will receive an email from STRNC each time a new match opportunity arises.
